

## Comments:

- Last week muni volume was about \$6.2 billion. This week volume is expected to be \$4.0 billion. The negotiated market is led by \$478.5 million for the Oklahoma Turnpike Authority. The competitive market is led by \$167.3 million for University System of Maryland on Tuesday.
- Last week credit spreads widened 1 bp for AA, A and BBB.
- Weekly reporting muni bond mutual funds reported an inflow of \$7 million for the week ending January 25 after an inflow of \$511.7 million for the week before. The eight week moving average is *negative* \$905.9 million.
- From Friday to Friday, MMD yields were flat in 1 to 5 and 10 years, decreased 1 bp in 7 years and increased 2 to 3 bps in 15 to 30 years. Muni/Treasury ratios for 10 and 30 year MMD maturities ended the week at 94.0% and 100.7%, respectively, about the same as last week.
- The 2 to 30 year MMD spread was 199 on Friday, 2 bps steeper than the previous Friday.
- Last week munis saw up and down movement. Monday saw munis steady but reluctant to move too far without getting some word from Trump about tax policies but seemed firmer in the afternoon. Tuesday saw stocks move higher on Trump's support for the gas pipelines. Munis seemed to hold steady, while Treasuries gave back much of Monday's gains. New issues had a hard time bumping on final pricing with several having to cut preliminary prices. Later in the week, munis gained some when Trump did not mention much in the way of fiscal or tax plans at the Republican Retreat. Economic data seemed to be more front and center at the end of the week with initial claims higher than expected and weak 4Q GDP. Munis finished on a positive note as the market was encouraged by the lower new issue volume for this week.

Selected Deals for the Week Ending 2/3/17			
Issuer	Par (\$mil)	Ratings (M/S&P/F/K)
