

MAXq Analytics

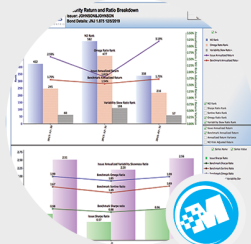

The power of customized solutions across a broad spectrum of content makes MAXq a must have among portfolio managers.

MAXQ.MISCHLERFINANCIAL.COM

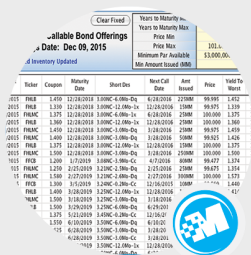

PORTFOLIO / BENCHMARK

Robust portfolio analytics and custom benchmarking models allow portfolio managers the flexibility to create and monitor portfolio strategy, compare and contrast portfolio performance and quickly make important portfolio management decisions.

HISTORICAL TRACKING

Track over one thousand variables in your portfolio and benchmark strategy over any time frame you choose. The Historical Tracking model starts tracking your performance data from the first time you use the system and will allow users to create dynamic charts and graphs to pull detailed historical data in an instant.

INVENTORY MANAGER

Organized and efficient layout provides considerable detail managers need when making investment decisions. Filtering options embedded in each matrix make constraining offerings very easy and creates efficiency when evaluating between offerings. Algorithmic pricing also ensures competitive pricing and best execution is top priority.

ABOUT MAXq

MAXq Analytics Cloud platform was created with the understanding that most portfolio managers do not have a singular task to accomplish, but are instead required to serve a complex and dynamic function in a constantly changing market environment.

Much like a portfolio manager, MAXq does not have a single focus. It has been designed to create information and reporting efficiency to address many of the complexities of portfolio management.

WHY CHOOSE MAXq?

- 1 It's Free! Qualified MFG Institutional clients have access 24/7, 365 days a year.
- 2 Customized modeling and individualized focus makes MAXq truly unique in the marketplace.
- 3 Cloud framework means nothing to install. Use the power of your browser or mobile device and hit the ground running.
- 4 Dynamic model library means users have access to the newest models and updates as they happen.
